Subject: RE: Recycling Systems Map

Hey Ron,

No worries and no need for “correction” I just didn’t want you to get bogged down in discussions with Trina or others if it came up given we had reached out to coordinate – great minds think alike, unfortunately we were all running trying to meet deadlines and didn’t get the coordination done in time for the event.

The great thing is we are all thinking along the same lines – just showing great minds do think alike, all we need now is alignment.

Thanks

Randy

Thanks Randy. I’m sorry about the communication breakdown. We will get that addressed immediately. Thanks for the call. I really don’t want to come off negative as I think the work that you are doing is fantastic and much needed. I was just surprised when I saw the infographic map.

I think we have a good path forward and apologize for causing delays.

Thanks,
Ron

Just so you don’t think I was dreaming this stuff up, look forward to getting the measurement workgroup flow diagram so we can align graphics and get this released for use.

Subject: Recycling Systems Map

Hi Brandon and Swarupa,

On behalf of the education committee, KAB has valiantly offered to develop some infographics to communicate with the public about recycling. One infographic that Randy and his team have been working on is a map of how materials move from manufacturing through to recycling. There are some elements that are similar to our recycling systems map, and I wondered if it might make sense that rather than reinventing the wheel, the Measurement group shared its current map with Randy and see if he can turn it into an infographic? What do you all think?
